

AI Studio Pro

Offline Multi-Tool AI System

A Smart AI Application using Python & Streamlit

 CREATED BY PALLAVI KHADSE

AI / FULL STACK AI SAAS

Project Overview

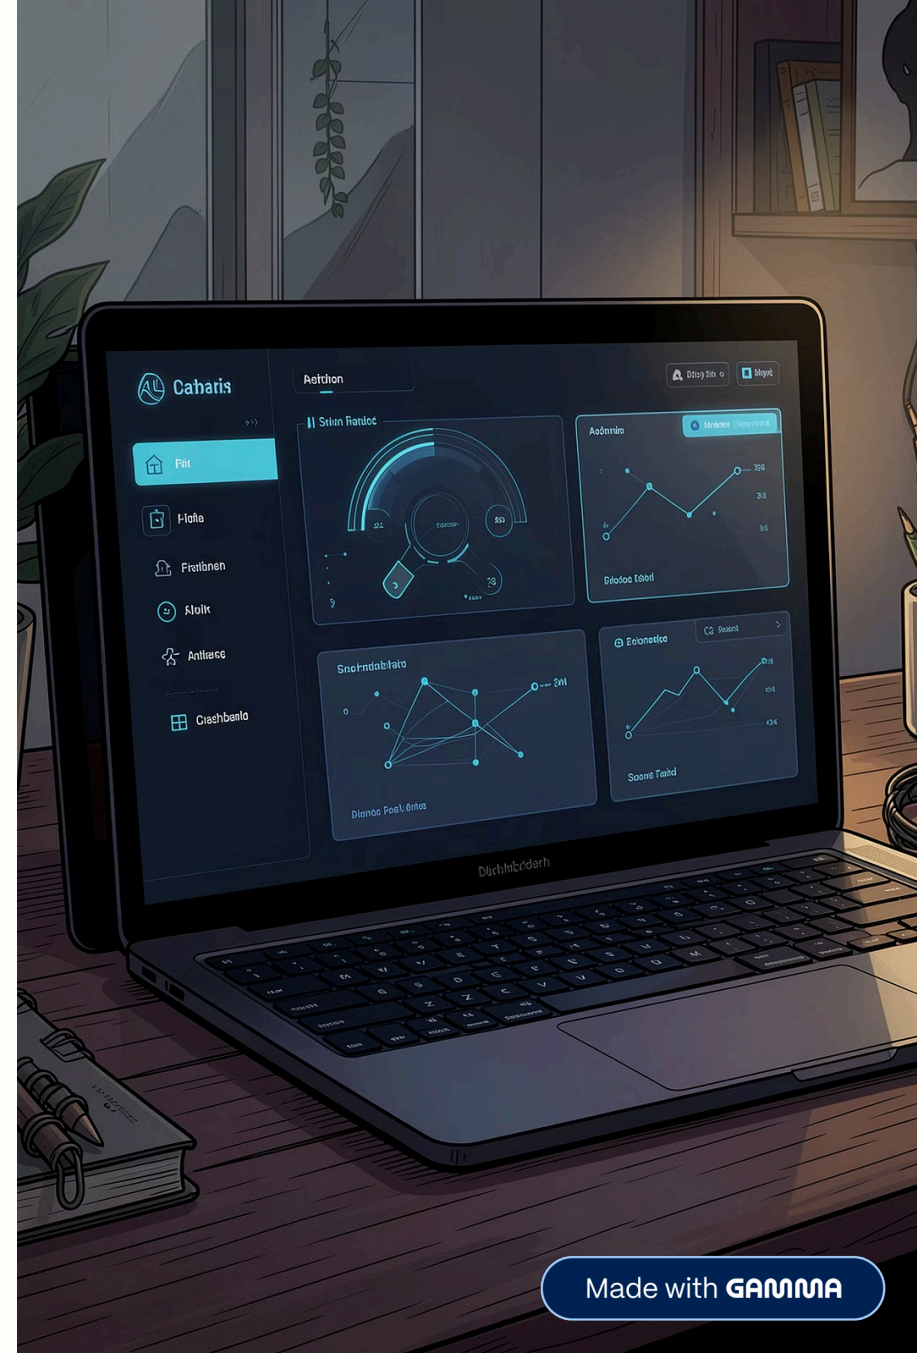

AI Studio Pro is an **offline AI-powered multi-tool application** — a resume-ready AI SaaS project that works without paid APIs.

 AI Chatbot

 Image Generation

 Text-to-Speech

 Smart UI

Objective

→ Free AI Assistant

Build a fully free AI assistant system

→ No Paid APIs

Reduce dependency on paid APIs

→ Multi-Modal Tools

Provide multi-modal AI tools in one platform

→ Resume-Ready

Create a resume-ready AI SaaS project

Key Features

AI Chat System

Offline chatbot using Ollama (TinyLlama / Llama3.2)

Image Generator

Text → AI image generation with download option

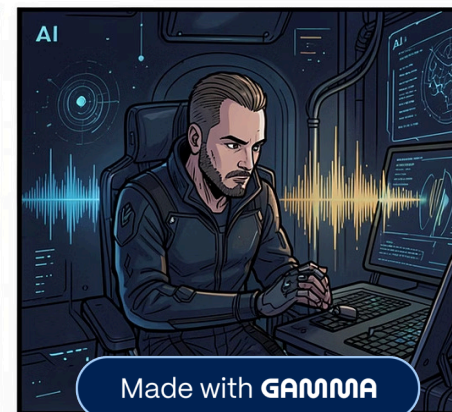

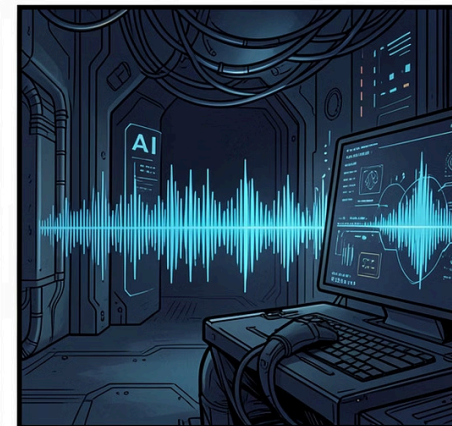

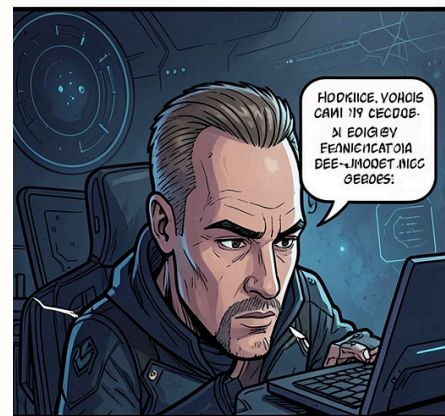

Audio AI

Text → Speech, adjustable speed, download MP3

UI Design

Modern dark theme, clean dashboard-style interface

Technology Stack

Python

Streamlit

Ollama LLM

Pyttsx3

Text-to-Speech

Pillow

Image Processing

Requests

API Handling

How It Works

Enter Prompt

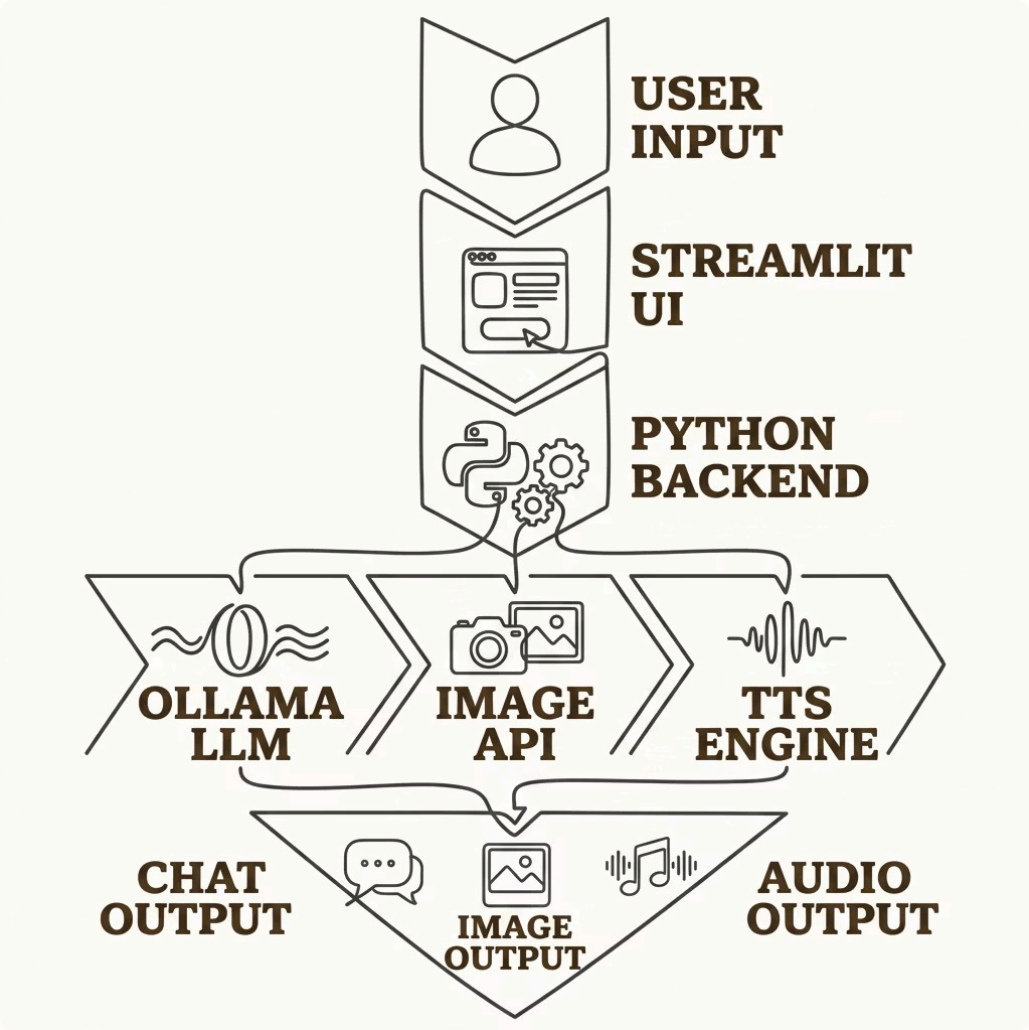

Process with Ollama

Generate Output

Download Results

A seamless pipeline from user input to downloadable AI-generated output — chat, images, and audio.

System Architecture

Architecture Flow

A clean layered architecture ensures smooth data flow from user input through the Streamlit UI and Python backend to the AI engines, delivering chat, image, and audio outputs.

Use Cases

Education

AI learning tool

Content Creation

Presentation Assistant

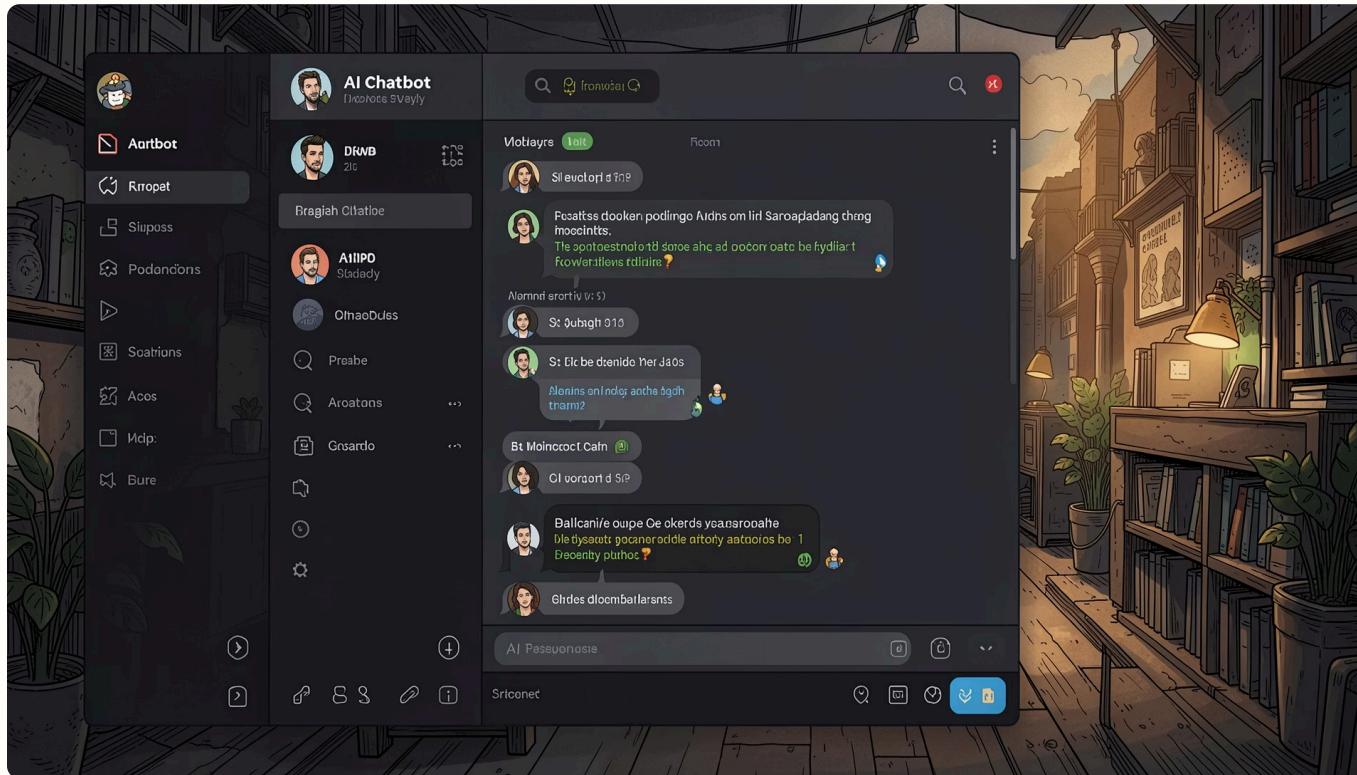

Personal Chatbot

Resume Showcase

Resume project showcase

Project Output

What the App Looks Like

Chat Screen

Offline AI conversation interface

Image Generator

Text-to-image with download

Audio Generator

Text-to-speech with speed control

Conclusion & Future Scope

A **powerful offline AI system** built with Python & Streamlit.

✓ Achievements

Offline AI tools, no paid APIs, multi-modal system, modern UI

🔮 Future Enhancements

Voice input, memory-based chat, multi-language support, cloud deployment

🔑 "AI Studio Pro proves that powerful AI applications can be built without expensive APIs — just smart engineering."
